To test the send functionality of your fax machine, send a one-page fax to 1-855-330-1239 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero. This site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully it will automatically answer and spit out the test fax.

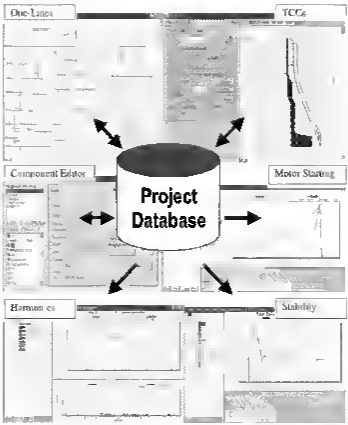
Important Concepts

Project Files

All project related information is stored in a separate folder created for each project. The folder is created automatically when you start a new project in PTW. All the one-line diagrams, report files and project data files for each project are stored in the project folder.

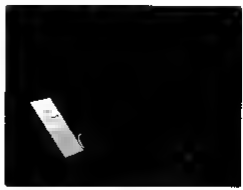
Database

One of the most important concepts in PTW is that the database stores all of the project information. An individual component may be displayed on any number of one-line diagrams and TCC drawings, but it is a single entity in the database. You can add components to the project database from a TCC drawing, a one-line diagram or the Component Editor.



Read in Bright Sunlight with No Glare

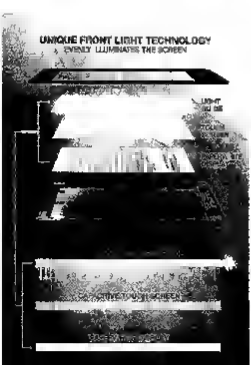
Kindle Paperwhite has a matte screen that reflects light like ordinary paper so you can read as easily in bright sunlight as in your living room with no glare.



Read at Night

With Kindle Paperwhite, reading in bed just got better. The patented built-in light illuminates the screen—not the entire room, so you won't disturb your partner when you can't put your book down at night.

Patented Built-in Light



Patented built-in light

Designed for Reading

Unlike a backlit tablet display, Kindle Paperwhite guides light towards the surface of the display. From above, it's like the light never shines directly towards your eyes, allowing you to read comfortably without eye strain. The built-in light illuminates the screen more evenly than a desk light or lighted cover.

Perfectly Balanced Whiteness

We worked on Kindle Paperwhite for over two years to perfect the uniformity of the built-in light. Fastening out a fiber optic cable into a sheet—and remembering to ensure perfectly even distribution of light. Our design uses nanoscale optical diffractive patterns to enable light rendering over the direction of the light. Enjoy reading with acceptable lighting uniformity and evenly balanced whiteness across the entire display. See the screen light in different lighting conditions.

Adjustable Brightness

Your eyes adjust to the amount of light around you, so you'll prefer dimmer light reading in a dark setting and brighter light when reading in well-lit surroundings. Adjust the brightness of Kindle Paperwhite across a wide spectrum—from low light to high brightness—so you can read comfortably in any setting.

Power Efficient

Because our patented technology enables fine-grain control over where the light is diffused, Kindle Paperwhite uses low-power LEDs, requiring very little power to evenly illuminate the entire screen.

HARDWARE & PLUMBING & ELECTRONICS & LAWNCARE

FAMILY OWNED AND OPERATED FOR OVER 60 YEARS!

These are the best diaper cakes out there! Why? Because everything is useable from the individually rolled diapers to the bottle in the center!

They are different than most because they are not just un-edible decoration. These also make a great gift. Everything except some of the ribbon and a few of the decorations are 100% useful (see ingredients below). I do not use glue or tape on these to make sure everything stays in new condition.

This is a small or mini Diaper Cake. It measures about 8 inches tall by 6 inches wide. These make a great gift or a package topper and your parents to be will LOVE it!

The one pictured is made and ready to ship. I also accept custom orders for this product. I can do them in pretty much any color or theme! If you want something special please contact me for pricing.

Note: I individually roll each diaper and put a rubber band around it! This ensures that there is no stretching of the elastic in the diaper end makes the diapers super easy to use! Also I use size 3 diapers so that if the parents choose they can enjoy the diaper cake just a little longer!

8 Size 3 Diapers
2 Spoons

7 View State Versus SessionState

SessionState should be avoided as much as possible. We have made a class called SessionAccess that contains all the information we need for a session. We store small things as items. We do not want to store a big object since this will be duplicated to memory for each session (unless we store like sessions some other place). If you need to store some state data, use SessionAccess if possible. Please discuss this as make sure that is the right decision.

TEST FAX

The vast majority of the posts about this are from me. I am the one that had the hard time with this with a brand new and the dealer could not figure it out. Even sent a rep out to see the mower out in the field. They were just about to have a new deck put on my mower. We changed belts, tried different pitches, and other things. Finally, we played around with some blades and suddenly found the streak to go away with the solid full high-lifts. The streak is caused by the forward sweep of the center blade. It lays the grass over slightly. This happens especially more at the time of year when the grass gets real tough. So you are fortunate. You have the old style spindles that take the 5/8" arbor. These blades are relatively easy to find. A good alternative? Look at the blades. This is what I use. They are a 20 1/2" blade with a 5/8" arbor. The difference is the bevel is much longer going almost to the center of the blade. Now while the blade doesn't actually cut grass that far up (it may mulch a little bit up there), the longer bevel WILL suit down on the drag of the blade. Another funny thing, these blades are usually cheaper than the blades listed under from suppliers (as a great source). Do this, and your problem will be cured. I have been through this many times and have also showed many others - whom of which have found the same thing. Happy mowing.

Hello.

Can you hear me?

Championzone Certification and Course System
Use cases

Use Case Description: Take Certification Course
Precondition: The person plans to register for a certification course.
Main flow of events: The use case starts when a person registers to take a certification course by creating personal information, payment information and selecting a course date and location. The system automatically adds registrants to the class based on availability on a first-come first-served basis. Payment is processed when the participant shows up for the class anytime during the course period he was registered for.
Postcondition: The person is registered for a certification course and receives an acknowledgement with the date and location of the class.

Use Case Description: Apply for Taking the Certification Exam
Precondition: The person plans to register for a certification test.
Main flow of events: The use case starts when an applicant applies by entering the following information: name, address (e-mail), experience, birth date, references, and company. The system checks for missing information and validates the date. If all information is present and valid, the system acknowledges the entry and stores it into the Application List data store with application status "for review". A program administrator examines the applications in the Application List with the "for review" status. At the time the status is changed to "under review". The administrator checks references and then either approves the application (application status changes to "approved") or denies it (application status changes to "denied"). In any case, an e-mail or letter is sent (depending on how the applicant applied) informing the applicant on the status of the application.
Exceptional flow of events: The applicant can cancel an application before submitting it online, or afterwards (online or in writing) as long as the status is "for review" or "under review". The application will then be deleted from the application list, and if its status was "under review" the administrator will be informed.
Postcondition: The person is approved to register for a certification test, or denied.

Create a Group

There are three ways to create a group—manually, from People Query search results, and running reports that have the Temporary Group output type. No matter which way you choose to create your groups, they are always available. You can access your groups by clicking **Groups** > *Groups by Group Type* > **View All**.

Your church may have created special Group Types for you to use when creating groups. If this is the case, you will be able to create a group for one of the following types:

- **People List**—this is the default group type that is already configured in Fellowship One. This is typically a generic list or private group that you keep for your own benefit, (think of an email address book that is static and is updated manually). Through people lists you can add/delete members, communicate with those on your list via email, and share your lists with others you select, however, people lists are not public, or managed through Fellowship. People lists are great for personal lists of people with which you communicate frequently, but beyond that, have no real connection.
    - Possible Scenario: If you frequently email all of the ministry staff you can create a people list. You wouldn't necessarily want to create an entire group around this because you don't need to manage it, create a schedule for it, etc. A people list is perfect for this type of group and is easily created in a few easy steps.
- **Groups** – One of the custom group types your church has configured and granted you security rights to access. See "Groups"

Create a people list group and add people manually

One way to create a group is to simply create the group! You don't even have to have any people in the group to begin with.

3. The market research department at a nursery determines that demand for garden shrubs is given by

$$Q = 1\,000 - 5P_S + 0.05I - 50P_T$$

Where P_S is the price of shrubs, I is income, and P_T is the price of trees.

If P_S = $5, I = $20 000, and P_T = 15

a. Determine the quantity of shrubs demanded.
b. Compute the income elasticity for shrubs. Are shrubs a necessity or a luxury?
c. Compute the cross elasticity for shrubs and trees. Are these two goods substitutes or complements?

4. In 1998, the fare on Chicago's transit system was 60 cents per ride and 711.8 million trips were sold that year. In 1999, the fare was increased to 80 cents and ridership declined to 682.4 million trips.

a. Compute the price elasticity for transit ridership assuming all other factors affecting demand remained the same.
b. Based on your answer to part (a), was the 1999 action of the action of the transit managers optimal? What was the impact of the 1999 change on total revenues?
c. What other factors may have had an impact (positive or negative) on ridership in this period?
d. In 2000, there was another fare increase, this time to 90 cents per trip, and ridership declined further to 640 million trips. What is the price elasticity given the 1999 and 2000 numbers?
e. How would you explain the differences between the two price elasticities you have computed above?
f. The transit authority is once again thinking of raising fares, this time to $1 per trip. Would the elasticity increase or decrease if fares were increased to $1 per trip? Would you recommend such a fare increase if you were a transit analyst?

5. DynaLinear Ltd. produces digital-to-analog converters for compact disk players used by radio stations and audio enthusiasts. It is contemplating an expansion into the moderately-priced home audio market by producing a CD player that would sell at a price of $350. The product on of each CD player would require $100 in materials and 7.5 hours of labor at the rate of $20 per hour for wages and fringe benefits plus variable overhead tied to labor. Energy, supervisory and other variable overhead costs would amount to $50 per unit. The accounting department estimates that fixed overheads will be $25 per CD player at the projected sales volume of 14 000 units.

A. What is DynaLinear's breakeven sales volume (in units) for home audio CD players?
B. Calculate the degree of operating leverage at a projected volume of 14 000 units and explain what the DOL means.

Prologue

Gentles, perchence you wonder at this show:
But wonder on, till truth make all things plain
This man is Pyramus, if you would know.
This beauteous lady Thisby is certain.
This man, with lime and rough-cast, doth present
Wall, that vile Wall which did these lovers sunder;
And through Wall's chink, poor souls, they are content
To whisper. At the which let no man wonder.
This man, with lanthorn, dog, and bush of thorn,
Presenteth Moonshine; for, if you will know,
By moonshine did these lovers think no scorn
To meet at Ninus' tomb, there, there to woo.
This grisly beast, which Lion hight by name,
The trusty Thisby, coming first by night,
Did scare away, or rather did affright;
And, as she fled, her mantle she did fall,
Which Lion vile with bloody mouth did stain.
Anon comes Pyramus, sweet youth and tall,
And finds his trusty Thisby's mantle slain:
Whereat, with blade, with bloody blameful blade,
He bravely broach'd his boiling bloody breast.
And Thisby, tarrying in mulberry shade,
His dagger drew, and died. For all the rest,
Let Lion, Moonshine, Wall, and lovers twain,
At large discourse, while here they do remain.

- Failure to submit a Self-Certification Affidavit, and if required a medical examiner's certificate will result in the downgrade of your CDL to a non-commercial driver license. **Once downgraded, you must complete all knowledge and driving tests to reinstate your CDL.**

Remember your driving record is your personal driving history so it is a good idea to check your record occasionally to make sure that no incorrect information was reported.

Driver Responsibility Program (DRP)

This program was developed to encourage safe driving habits and requires DPS assess surcharges to individuals based on certain traffic offenses. These surcharges are assessed in two ways: a point system and conviction based.

- Points are assessed for Texas or out of state moving violation convictions: two (2) points for a conviction, and three (3) points for a conviction that resulted in a crash. Individuals are assessed a point surcharge annually if they maintain six (6) or more points on their driver record.
- A Conviction-based surcharge is a result of being convicted of Driving While Intoxicated, No Driver License, Driving While License Invalid, and No Insurance. Points are not assessed for these specific offenses. A conviction based surcharge will be assessed annually for three (3) years from the date of conviction. An individual can also pay all three (3) years in advance. DPS also offers programs that may reduce or waive surcharges. For more information about DRP, please visit: http://www.dps.texas.gov/DriverLicense/drp.htm To check your driver status please visit: https://txapps.texas.gov/txapp/txdps/dlelig/dlstatus.jsp Please note: Surcharges are in addition to other fees and do not replace a suspension, revocation, denial, disqualification or cancellation resulting from the same conviction.

Is interested in determining the value based on the price a knowledgeable buyer would pay for a piece of property. As defined by Wisconsin State Statute, sales show evidence and are the basis to use in valuing property at "full value" which has been defined by the courts as synonymous with market value. Market value is "the most probable price in cash or its equivalent which a property would bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently, knowledgeably, and without compulsion. Note that market value is neither the highest nor the lowest price paid, but the most probable price. Buyers and sellers through their market transactions, tell Assessors the important factors and trends taking place in the market. It is the reasonable sales of buyers and sellers that ultimately are used in determining assessed values.

The fairest and most uniform process is to update assessments frequently. Because of our yearly revaluation program we can deal with these factors swiftly by recognizing change in the market for each January 1st assessment date. For the January 1, 2009 valuations, the 2008 sales were used as benchmarks. Any changes in the market we experience during 2009 will be considered for the 2010 revaluation.

Many property owners equate new assessed values with corresponding changes to their property tax bill. That is not necessarily the result nor is it the reason for the revaluation. The revaluation ensures that the distribution of property taxes is fair and impartial. Many factors affect values and cause assessment changes to differ. As all real estate professional will agree, location is the single most important consideration. However, type of property, design, condition, quality and many other factors also play a role in determining value. Property taxes, on the other hand are determined by various taxing bodies including, the State of Wisconsin, Milwaukee Public Schools, Milwaukee County, Milwaukee Metropolitan Sewage District, Milwaukee Area Technical College and the City of Milwaukee - not the Assessor's Office. Any complaints about taxes should be addressed directly to those units of government. The amount that each property owner will pay in taxes will not be determined until December when all the taxing units approve their budgets.

Testing Your HP Fax Machine with the HP Fax Test Service

Support details

Introduction

This document will assist you in testing your HP Fax machine using the HP Fax Test Service

Print this document for easy reference by clicking the Printable Version link at the upper right corner of this page.

Test your fax machine

To test fax capability of your fax machine, follow the directions below:

NOTE: Be sure that your phone number is not Caller ID blocked by your telephone company prior to attempting to send and receive a fax. Pressing *82 before dialing the fax number will unblock the Caller ID blocking feature in most areas. Other phone customs should be researched with your local telephone company, and checking or call privacy is turned.

NOTE: Whenever troubleshooting a fax issue, a good practice is to turn the Automatic answer option to 'Every Ring' before attempting a fax test. This way, even if the auto fax fails, the error tests will be generated that can guide you in future troubleshooting. This option is available in almost all models on different products, consult the manual User's Guide for specific steps.

1. Send a fax page (plain text white text box is **1-888-HPFAXTEST (1-888-473-2978)**.
2. When your fax is received by the **HP 1 Fax Fax Service, we will generate a return fax to you** within five minutes confirming that we received your fax. This verifies that you can both send and receive a fax with your fax machine.

If you do the Receive a return fax within 5-7 minutes, there may be a problem with fax setup of your Fax Machine. Consult the user manual that came with the product for proper setup and configuration.

NOTE: The most common cause of failure is not the fax number but the Fax Header on the machine does not match the number of the phone line connected to the fax. Also ensure that the fax manual operation for the Telephone Number option of the following preceding are also valid.

Prayer to St. Joseph over 1900 years old

O St. Joseph whose protection is so great, so strong, so prompt before the Throne of God, I place in you all my interests and desires. O St. Joseph do assist me by your powerful intercession and obtain for me from your Divine Son all spiritual blessings through Jesus Christ, Our Lord, so that having engaged here below your Heavenly power I may offer my Thanksgiving and Homage to the most Loving of Fathers. O St. Joseph, I never weary contemplating you and Jesus asleep in your arms. I dare not approach while He reposes near your heart. Press him in my name and kiss His fine Head for me, and ask Him to return the Kiss when I draw my dying breath. St. Joseph, Patron of departing souls, pray for us. Amen

Say for nine consecutive mornings for anything you may desire. It has seldom been known to fail.

This prayer was found in the fiftieth year of Our Lord Jesus Christ. In 1500's it was sent by the Pope to Emperor Charles when he was going into battle.

Whoever reads this prayer or hears it or carries it, will never die a sudden death, nor be drowned, nor will poison take effect on them. They will not fall into the hands of the enemy nor be burned in any fire, nor will they be defeated in battle.

Make this prayer known everywhere.

Bishop of Trenton

Other languages and build tools often rely on imperative scripts, forcing developers to write explicit instructions for how to achieve a desired state. Puppet's declarative approach allows users to describe what the system should look like, leaving the underlying mechanics to the platform.

Configuration Language and Resource Abstraction Layer

At the core of Puppet is its declarative language, which uses a domain-specific format to define resources. These resources can be files, system services, software packages, or even more abstract concepts like firewall rules or user accounts. The Puppet agent translates these declarations into system-specific commands, ensuring consistency across different operating systems.

Puppet's resource abstraction layer is one of its most powerful features. It allows administrators to write code that is largely independent of the underlying operating system. For example, a single manifest can manage a package named `nginx` on both Debian and Red Hat systems, with Puppet automatically selecting the correct package manager (`apt` or `yum`) behind the scenes.

```
package { 'nginx':
  ensure => present,
}
```

Configuration Language

Puppet's declarative language is designed for describing system configurations. Users define resources and their desired states, and Puppet ensures that the system matches these definitions. This approach abstracts away the complexities of imperative scripting, allowing administrators to focus on what they want rather than how to achieve it.

A typical Puppet manifest might look like this:

```
package { 'nginx':
  ensure => installed,
}

service { 'nginx':
  ensure => running,
  enable => true,
  require => Package['nginx'],
}
```

This example ensures that the Nginx package is installed, the service is running, and it is enabled to start on boot. The `require` parameter establishes a dependency, telling Puppet to install the package before attempting to start the service.

Puppet's configuration language includes features like variables, conditionals, and loops, enabling more dynamic and flexible configurations. For instance, you can use facts—system information gathered by Puppet—to make decisions based on the node's characteristics:

```
if $facts['os']['family'] == 'RedHat' {
  package { 'httpd':
    ensure => installed,
  }
} elsif $facts['os']['family'] == 'Debian' {
  package { 'apache2':
    ensure => installed,
  }
}
```

This snippet installs the Apache web server using the appropriate package name for either Red Hat or Debian systems.

Installing Vim

To install Vim, you can use the package manager specific to your operating system. For example, on Debian-based systems, you would run:

```
sudo apt-get install vim
```

On Red Hat-based systems, the command is:

```
sudo yum install vim
```

After installation, you can verify the version of Vim installed by running:

```
vim --version
```

This will display detailed information about the Vim version, including its features and compile options.

Configuring Vim

Vim's configuration is typically stored in a file named `.vimrc` in your home directory. You can customize various settings, such as enabling syntax highlighting, setting indentation rules, and defining key mappings. For example, to enable syntax highlighting, add the following line to your `.vimrc` file:

```
syntax on
```

To set the number of spaces for indentation, you might add:

```
set tabstop=4
set shiftwidth=4
set expandtab
```

These settings configure Vim to use four spaces for each indentation level and to convert tabs into spaces.

Using Vim

Vim operates in different modes, including normal mode, insert mode, and visual mode. In normal mode, you can navigate and manipulate text using various commands. To enter insert mode, press `i`. To return to normal mode, press `Esc`.

Here are some basic commands to get you started:

- `h`, `j`, `k`, `l`: Move the cursor left, down, up, and right, respectively.
- `x`: Delete the character under the cursor.
- `dd`: Delete the current line.
- `yy`: Copy the current line.
- `p`: Paste the copied or deleted text.
- `u`: Undo the last change.
- `:w`: Save the file.
- `:q`: Quit Vim.
- `:wq`: Save and quit.

To search for a specific pattern, use the `/` command followed by the pattern you want to find. For example, `/hello` will search for the word "hello" in the file.

Updating Vim

To update Vim to the latest version available in the repositories, you can use the package manager. On Debian-based systems:

```
sudo apt-get update
sudo apt-get upgrade vim
```

On Red Hat-based systems:

```
sudo yum update vim
```

This will ensure that you have the most recent stable version of Vim installed.

Installing a Specific Version of Vim

To install a specific version of Vim, you may need to specify the version number when using the package manager. For example, on Debian-based systems, you can list available versions with:

```
apt-cache policy vim
```

Then install a specific version using:

```
sudo apt-get install vim=2:8.1.2269-1ubuntu5
```

On Red Hat-based systems, you can use:

```
sudo yum install vim-8.0.1763-15.el7
```

Keep in mind that installing specific versions may require additional steps, such as adding third-party repositories.

10 Reasons

WHY YOU SHOULD CONSOLIDATE DEBT NOW!

(And why participating in this program is the way to do it)

1. **YOU'RE PRE-APPROVED!** Just be sure to use the Pre-Approval Code on the enclosed letter when you request your quote.

2. **SAVE MONEY.** By consolidating high interest debt like credit cards with a lower interest loan like the one you can get through this program, you could save hundreds or even thousands of dollars.

3. **BOOST YOUR CREDIT SCORE!** By consolidating debt or paying off credit cards, you may improve your credit score. **76% of borrowers experience a FICO score increase three months after obtaining their loan, with an average score increase of 21 points!*** And of course, checking your rates to view the loan offers you qualify for will not impact your credit score.

4. **STOP WASTING A FORTUNE!** Borrowers who used a personal loan via Lending Club to consolidate debt or pay off high interest credit cards report in a survey that the interest rate on their loan was an average of **35% lower than they were paying on their outstanding debt or credit cards.****

5. **GET UP TO $40,000*** with low fixed monthly payments, flexible terms, and no collateral.

6. **PAY JUST ONE BILL EVERY MONTH.** Instead of all those credit card bills and loan statements, you'll get just one bill a month.

7. **USE THE MONEY FOR OTHER EXPENSES!** You don't have to use the money from this program to consolidate debt. You can use it for other expenses like major purchase, home improvement, vacation and other.

8. **IT COULDN'T BE MORE CONVENIENT!** Just visit www.MyInstantOffer.com to get a quote and, if you like what you see, apply right online. Checking your rate will not affect your credit score.

9. **YOU CAN START SAVING IN AS LITTLE AS 7 DAYS!** You can have your money—and start paying off those high-interest debts—just that quickly.

10. **PREPAY AND SAVE EVEN MORE.** You can prepay your loan at any time to eliminate future interest payments. There's never a prepayment penalty or fee.

*Average credit score change of all borrowers who took out a loan via Lending Club between January 1, 2013 and September 30, 2015 with a stated loan purpose of debt consolidation or pay off credit cards.

**Based on responses from 12,736 borrowers in a survey of 66,495 randomly selected borrowers contacted from January 1, 2013 - January 1, 2016, borrowers who received a loan to consolidate existing debt or pay off their credit card balance reported that the interest rate on outstanding debt or credit cards was 21.90% and average interest rate on loans via Lending Club is 14.39%.

After all approved and listed loan amounts of $6,000 or less, you are guaranteed 100% funding for all other loans you are guaranteed to receive at least $6,000 at your approved APR.

REVOLUTIONIZING THE GREEN TEA EXPERIENCE
Check out Booth #4448 at this year's Winter Fancy Food Show to find Tzu Thé's 100% Natural, EGCG Rich Green Tea, Nutrition Bars and Innovative Accessories

(Atlanta GA)- This year the tea market reached a whopping 5.1 billion dollars in sales. Inevitably leading to an immense amount of specialty, gourmet, supermarket, natural foods and gift basket buyers trying to get their hands on a piece of this golden pie. However, what will truly make a tea stand out in this overcrowded market is not only quality, but versatility and convenience. When looking for such a tea look no further than **Tzu Thé at Booth #4448 at the NASFT Fancy Food Show in San Francisco.** With their world class packaging, **Tzu Thé** offers healthy, convenient and fashionable green tea products for any lifestyle, making it truly "revolutionary."

Tzu Thé's beautiful, innovative and unique packaging will draw the consumer's eye directly to the product on the shelves. **Tzu Thé** is the first green tea company to offer the single-serving T POD™ filled with premium loose dry green tea leaves that are pesticide-free and packed full of EGCG[1]. These convenient individual tea pods make drinking green tea easy for consumers on-the-go. Far even more convenience, **Tzu Thé** has introduced a line of accessories. The first is the T-Buddy™, a "Two Headed" portable tea bottle with a built in infuser that doubles as a tea mug and a tea pot for hot or cold beverages on the go. The second is T2-GO, a steeping device that snaps on to standard 12oz and 16oz hot paper cups.

Tzu Thé has also combined all the health benefits of green tea with the popularity and convenience of food bars, creating the innovative T-Bar™. The T-Bar™ is a raw, whole food, green tea nutrition bar that has been cold processed, promoting optimum enzyme activity. These vegan-friendly bars contain

[1] The most potent form of antioxidant, providing health benefits that **may** help to reduce risks of cancer and tumors, lower cholesterol, help with digesting excess fat, and even protect against the common cold virus.

2 Refrain from ongoing representations – The Planning Authority has a six week period, following receipt of written representations, within which to issue a warning letter (if considered appropriate in the circumstances concerned). Once representations are acknowledged we would ask persons concerned to refrain, during this 6 week period from regularly calling to, phoning or writing to the Enforcement Section, regarding progress on the representations. It is our experience that when circumstances such as this occur, it inevitably delays enforcement action because staff time and resources which are limited, tend to be consumed in multiple dealings with persons making representations. This situation is neither in the interests of those making representations nor the Planning Authority itself, and ultimately the general public.

We would therefore request that you allow the Planning Authority to process representations within this six week period. If however during this period you become aware of significant further details/information on the case (e.g. in regard to identity of developers/owners etc.. or any escalation of the development) then please feel free to bring such information/details to our notice in writing.

3 Freedom of Information Act, 1997-2003 – Representations regarding unauthorised development constitute part of the Council's records for the purposes of the above acts. The Council will endeavour to maintain as confidential any representations made to it in confidence and in good faith. The Council cannot however give absolute guarantees on this as requests under the Freedom of Information Act can be appealed by requesters to the Information Commissioner.

The Council would like to point out however, that where representations transpire to have been made in bad faith or maliciously then the person making such representations cannot have an expectation that the record(s) of his/her representation will be treated in confidence.

4. Feedback from Planning Authority – Having processed a representation the Council may or may not decide to issue a warning letter and/or enforcement notice. Where it is decided not to issue an enforcement notice, you will be notified by the Planning Authority within two weeks of the decision.

Where an enforcement notice is issued you will be notified of the fact.

Specific provision for the above notifications is provided for under the enforcement provisions of the Planning and Development Act. The Planning Authority however, also undertakes to notify you if a warning letter is issued or if it is decided that a warning letter is not warranted.

Zora Arkus-Duntov, Corvette Grand Sport to be inducted into Bloomington Gold's Great Hall

Posted by Daniel Strohl Photos courtesy GM Media. He didn't conceive of the Corvette. He didn't shepherd it from concept to production. He didn't drive one to a championship. He didn't have much to do with its styling. Yet Zora Arkus-Duntov is unarguably the most important person in the history of Chevrolet's fiberglass-bodied sports car, and it's only fitting that Bloomington Gold induct him into their Great Hall next year. Born in Belgium in 1909, Duntov began racing motorcycles and cars when he was 18 and packed that interest int... Read On>>

ST JOHN VIANNEY CATHOLIC CHURCH
PRINCE FREDERICK, MD 20678

February 23, 2012
www.stvchurch.net

Dear Friends,

Our parish has undertaken many projects in the last ten years, from building a new church to building the Family Life Center All of them have been made possible by the generosity and commitment of our members

Almost three years ago we made a decision to undertake the renovation of the Vianney Room and the provision of more space for our religious education program. Many events could not be accommodated in our old space. We now have over 500 children in our religious education program

We have made steady progress in the planning and renovation. We have also managed to save 75% of the money we needed to start project. As you can see the renovation is underway!

However we must now present the Archdiocese with a plan for raising the final $200,000 we need to finish the Vianney Room construction and make some needed repairs at Church.

Once again I am asking your help and pledging my own participation I have pledged $3,000 for the renovation project and have already paid it into our fund

We need 200 families to pledge at least $1,000 to be paid over the next year That is about $20 per week.

Enclosed is a brochure describing the project. Also enclosed is a pledge card.

I ask you to prayerfully consider making a pledge and returning the card to the parish office along with whatever payment you feel you can make at this time.

Along with our Parish Pastoral and Finance Councils, I understand that there are many pressures on your finances We are grateful for whatever pledge you can make to provide for the future needs of our parish

Sincerely in faith,

Fr Peter Daly

Everyone from Boehner himself to 2012 Republican presidential nominee Mitt Romney [illegible] as the vice-presidential pick [illegible] urging Ryan to step up.

Ryan initially refused to even consider the possibility [illegible].

But now, Boehner antagonists [illegible] that Ryan, the chairman of the powerful Ways and Means Committee, is not their ideal alternative.

The Hill [illegible] some [illegible] on Friday.

Rep. Tim Huelskamp (R-Kansas), [illegible] Ryan's opposition to [illegible] as [illegible] he once said of him, Patty Murray (D-Washington), a [illegible] Senate Budget Committee.

Rep. John Fleming (R-Louisiana) insisted that Ryan is more [illegible] the middle of the road [illegible] Legislative Chamber itself.

"I think that's much media-driven. I think that's you guys who keep talking about Paul Ryan," Fleming told The Hill. "Paul has made it clear he's not interested.

Some conservatives, [illegible] also cited Ryan's conservative credentials. [illegible] Ryan was a part of a House Republican [illegible] Boehner [illegible] Cantor, and [illegible] Ryan Plan."

Dubbed Smart-Stuff Law To Punish Workers, Wages." The Conservative Review published a piece titled "Paul Ryan is the Medicine Worst Choice for Speaker."

And Red State's Erick Erickson noted that Ryan voted the "Congressional pick" [illegible].

"In a world of modern media — Ryan would make a terrible Speaker, with a young, feisty, free-market conservative front of the room. But he would suffer a vote of 'Hell no' from the House conservatives he has to oppose Ryan as the hands of much of the press to oppose conservatism itself," Erickson wrote while defending Ryan's work with establishment-minded Republicans.

"That's not true. But that story line is already baked in.

Other conservatives aren't so critical. Rep. Jodey Arrington (R-Michigan), part of [illegible] Budget Group, told The Hill that Ryan would be better than other Republicans [illegible] Cantor, Kevin McCarthy (R-California) or Jason Chaffetz (R-Utah), who shocked Washington by withdrawing his speaker bid on Thursday.

"I think that Paul Ryan would be a more acceptable candidate than the current leadership team, primarily because he's not in the current leadership team," Arrington said. "And a takeover is [illegible]

past 8:00 PM. I doubt ill answer. If I do, it's because I still can't perform my duties as a husband. Do you know what that's like? Well never mind, I know you don't have a clue.

A few demands that your office will meet.

1. I expect all hospital bills to be paid
2. I expect an apology
3. I expect this to never happen again

Rudolph snapped this with his iPhone as soon as I was pulled out of the house.

It's real, don't even question if it's a Photoshop job.

My phone is not ringing! Do your job!

Thanks,

Mr. Baumann's Ramblings and Thoughts:
Today we celebrated the 100th day of the school year. I was very impressed by the 100th day projects. Thanks for helping your child. A "Thank you" goes out to Skylar for bringing in a book for all his classmates, to Gavin for sharing pencils this week, and to Brecken for bringing in some plastic bags for us to use and thanks to Kylie for bringing in Fancy Nancy, the 100th Day of School. Speaking of plastic bags, I am one to make sure your child wears his/her snow pants and such home, unless they get really wet at school.
I have tested and sent home theme six reading words this week. Please have your child practice them. I

Using Correct Type of Phone Cord with Fax	**PASS**
Dial Tone Detection	**FAIL**
Fax Line Condition Test	**FAIL**

Your fax line has a weak signal

A dial tone was not detected.

Please check the items below then rerun this test.

Other equipment sharing the fax line can reduce the signal strength.

Disconnect any equipment which is sharing the fax line (including extension phones, answering machines and dial up PC modems)
If you are using a splitter or some other device between the fax and the wall jack, remove it and connect the fax directly to the wall jack

If the Fax Line Condition test still fails, contact your phone service provider to have the fax line checked

If your HP device is connected to a Private Branch Exchange (PBX) rather than the public telephone system, the Dial Tone Detection test may fail

However, you should be able to successfully send and receive faxes.

Refer to your User Guide for more information on the fax test and settings

Pick and Choose. Pick and choose your battles. If the conflict is more about your feeling of control, identify that. It is not worth a battle if she wears red socks with a purple skirt, opposed to not wearing socks at all.

In closing, remember that it's a learning experience for parents as well as children. Be patient with yourself and reflect at night what you did that was successful and what still needs to be worked on. Parents, you are learning a new language. Once you become fluent in it I promise not only will you be able to communicate with your children in a more respectful and loving way, but also with your family members, friends, teachers and co-workers. Having control over a situation by providing others to take control is a win- win situation. You be happy and you will be teaching your child a successful way of dealing with conflict.

I met a traveler from an antique land
Who said: Two vast and trunkless legs of stone
Stand in the desert. Near them, on the sand,
Half sunk, a shattered visage lies, whose frown,
And wrinkled lip, and sneer of cold command,
Tell that its sculptor well those passions read
Which yet survive, stamped on these lifeless things,
The hand that mocked them, and the heart that fed;
And on the pedestal these words appear:
"My name is Ozymandias, king of kings:
Look on my works, ye Mighty, and despair!"
Nothing beside remains. Round the decay
Of that colossal wreck, boundless and bare
The lone and level sands stretch far away.

-Percy Bysshe Shelley
'Ozymandias'

Before this universe there was another one…
a happy universe filled with bunnies. But that
one got destroyed in a great cataclysm brought
about by a major plot point. Pay attention,
there will be a test later.

SHRIMP SCAMPI WITH LINGUINE

serves 4 to 6 · time: 30 minutes

Creamy, garlicky, succulent shrimp are a match made in heaven for long, thin linguine. This Italian staple will forever find a place in your heart after you try my version.

1 pound dry linguine
4 tablespoons unsalted butter
2 tablespoons extra-virgin olive oil
2 shallots, finely diced
2 garlic cloves, minced
Pinch red pepper flakes
1 pound large shrimp, peeled and deveined
Kosher salt and freshly ground black pepper
½ cup dry white wine
1 28-ounce can whole San Marzano tomatoes
1 lemon, juice only
Extra-virgin olive oil
½ cup torn fresh basil leaves, for garnish

In a large stockpot of boiling salted water add the linguine, stirring to make sure the pasta separates. When the water returns to a boil, cook for 6 to 8 minutes until the pasta is not quite done. Drain, set aside.

In a large sauté pan combine 2 tablespoons of the butter and the 2 tablespoons oil and place over medium-high heat to melt butter. Add shallots, garlic, and crushed red pepper; sauté for 3 to 4 minutes, until the shallots are translucent. Season the shrimp with salt and pepper, add to the skillet and cook for 2 to 3 minutes or until shrimp turn pink. Remove shrimp and keep warm. Add wine, tomatoes and lemon juice to the skillet, crushing tomatoes with the back of a wooden spoon. Bring mixture to a boil. Reduce heat and simmer for 15 minutes to reduce the liquid. Return the shrimp to the skillet along with the cooked pasta. Stir well and season with salt and pepper. Drizzle lightly with olive oil and garnish with torn basil leaves.

Presumably you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both.

To test the send functionality of your fax machine, send a one-page fax to 1-888-877-1655 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero, this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully it will automatically answer and spit out the test fax

'Shut Up!': Bill O'Reilly Clashes With Alan Colmes Over Boston

Things got feisty on Tuesday night over at Fox News. Host Bill O'Reilly argued that the Tsarnaev family was able to get more than $100,000 in welfare benefits over several years due to a welfare system that is devoid of oversight. When his guest, liberal radio show host Alan Colmes, challenged him, O'Reilly told him to "shut up." Watch the dust-up HERE

Windows Fax and Scan

You can use Windows Fax and Scan to send and receive faxes using your computer and a fax modem or an external fax service provider. You can also scan documents or photos and send them in e-mail messages.

Before you can send and receive faxes, you must have a modem and access to a telephone line (or an Internet fax service provider account). You might also want to connect a telephone to your computer, so you can manually dial a fax number, receive voice calls, or switch between fax and voice calls.

To get started

1. Connect a fax modem to your computer

   Plug one end of a telephone cable into the jack on your computer or fax modem, and then plug the other end into a telephone wall jack. If you have a fax modem and a telephone connected to the same line, see Help for more information.

2. Open Windows Fax and Scan

3. Click Tools, and then click Fax Settings

   If you're prompted for an administrator password or confirmation, type the password or provide confirmation.

My Resume

I am a dynamic figure, often seen scaling walls and crushing ice. I have been known to remodel train stations on my lunch breaks, making them more efficient in the area of heat retention. I translate ethnic slurs for Cuban refugees. I write award winning operas. I manage time efficiently. Occasionally, I tread water for three days in a row.

I woo women with my sonorous and godlike trombone playing. I can pilot bicycles up severe inclines with unflagging speed, and I cook Thirty Minute Brownies in twenty minutes. I am an expert in sauces, a veteran in love, and an outlaw in Peru.

Using only a hoe and a large glass of water, I once single-handedly defended a small village in the Amazon Basin from a horde of ferocious army ants. I play bluegrass cello. I was scouted by the Mets. I am the subject of numerous documentaries. When I'm bored, I build large suspension bridges in my yard. I enjoy urban hang gliding. On Wednesdays, after work, I repair electrical appliances free charge.

I am an abstract artist, a concrete analyst, and a ruthless bookie. Critics worldwide swoon over my original line of corduroy evening wear. I don't perspire. I am a private citizen, yet I receive fan mail. I have been caller number nine and have won the weekend passes. Last summer, I toured New Jersey with a traveling centrifugal force demonstration. I bat .400. My deft floral arrangements have earned me fame in international botany circles. Children trust me.

I can hurl tennis rackets at small moving objects with deadly accuracy. I once read Paradise Lost, Moby Dick, and David Copperfield in one day and still had time to refurbish an entire dining room that evening. I know the exact location of every food item in the supermarket. I have performed covert operations for the CIA. I sleep once a week. When I do sleep, I sleep in a chair. While on vacation in Canada, I successfully negotiated with a group of terrorists who had seized a small bakery. The laws of physics do not apply to me.

I balance, I weave, I dodge, I frolic, and my bills are all paid. On weekends, to let off steam, I participate in full-contact origami. Years ago I discovered the meaning of life, but forget to write it down. I have made extraordinary four course meals using only a Vegomatic and a toaster oven. I breed prizewinning clams.

I have won bullfights in San Juan, cliff diving competitions in Sri Lanka, and spelling bees at the Kremlin. I have played Hamlet. I have performed open-heart surgery, and I have spoken with Elvis.

INDIVIDUAL CONFIGURATION (CONT'D)

For each employee that you selected to have an appointment book, you need to fill out the section (pages 8 through 11). You can print as many copies of this section as you need. The information you supply here will be used to customize the behavior of this employee's appointment book.

Employee Name: _____

INDIVIDUAL SERVICES CONFIGURATION

These are the services that are going to appear in the appointment book and will be available for appointments. For each service you need to specify five things. The first thing is the name of the service that will appear in the appointment book (such as Haircut, Full Color etc.)

The second thing you need to specify is the **setup** time of the service in minutes. This is the time that your employee takes to prepare for an appointment. For example, a stylist might need 10 minutes to prepare the equipment for a perm. If the appointment was made for 10:00 AM, the stylist needs to start preparing at 9:50 AM, but from the customer's point of view, the appointment starts at 10:00 AM. If there is not a setup time, please leave this field blank.

The third thing you need to specify is the **active** time of the service in minutes. This is the time that your employee is actively working on the customer. This means that the employee cannot attend another customer during this interval. For a haircut, for example, this time could be 30 minutes.

The fourth thing you need to specify is the **inactive** time of the service in minutes. During this interval, your employee is not attending the customer actively and could attend another customer. For example, if a specific service requires 30 minutes to let the customer's hair dry, the inactive time for this service might be 30 minutes because the employee can do a haircut on another customer while waiting. If there is not an inactive time, please leave this field blank.

The last thing you need to specify is the **ending** time of the service in minutes. During this interval, your employee is actively working on the customer, but it represents the *end* of the appointment. The employee cannot attend another customer during this interval. For example, after waiting for 30 minutes to let the customer's hair dry, a stylist might need 15 minutes to finish the procedure. In this case, the ending time of the service is 15 minutes. If there is not an ending time, please leave this field blank.

Why do people cross their 7's?
Oh wait, even computers don't do that

To draw a 7, and taking time to go back and cross it is just unnecessary. It isn't like drawing an F or E where the little lines are necessary to make an F or E.

Subject: Density Output Cards

3

At present a request for density output cards in a sensitometric computations run yields density cards corresponding to densitometer densities. If the test code used involves E.N.D conversions the density output cards must be run through a separate conversion program to correspond[illegible] plotted densities. [illegible]ds corresponding to individual strips are punched wh[illegible]ere [illegible]le strips is [illegible]y desired.

BACK

I propo[illegible] the [illegible]ar[illegible]ty card output is requested plotted densities are punched out. In the normal case these would simply be the average densities. If the test code calls for E N D conversion, it would be the E N D densities that are punched out. If the test breaks down, e.g. because of range check failure, we would get cards punched out for individual strips since individuals are plotted in that case.

I would appreciate your comments on this proposal by January 2 1971

It ended as it began a stunning vista of expansive rolling hills dressed in lush green forests and barren, shrubs friendly tussock on the outskirts of Queenstown, New Zealand. Four friends drunk in the view and remembered their time and the adventures experienced therein over a bottle of locally sourced *Georgelas Estate* pinot noir (the country's finest, grown in the vicinity).

From skydiving at 15,000 feet, to traversing 40-degree water in a canyon and boogie boarding in barely warmer white water rapids on the Kawarau River; these feet pitted long slack, sunshine-hungry capital beside New Zealand's most aggressive river and navigated rock-like gravel paths excavated centuries ago in the brand-new MINI Cooper S all in search of new experiences and memories.

Queenstown, a new Derby on New Zealand's South Island, boasts some of the most spectacular views in the world and countless opportunities for adventure activities. The town is surrounded by four ski areas and offers a host of outdoor activities ranging from bungee jump-

How to Fix Dents in a Stainless Refrigerato

By Elizabeth Grace, eHow Contributor

Stainless steel refrigerators are an expensive upgrade for any kitchen, and unfortunately, they are not as durable as their name suggests. If you manage to get the refrigerator installed without damaging it you can count yourself lucky, but be careful the first time you attempt to open the doors all the way. Oftentimes the doors will bump up against cabinets or other appliances, causing dents in the stainless steel. Before you consider buying a replacement door,try this auto body dent removal trick to fix the dent in your stainless steel refrigerator.

Difficulty: Easy

Instructions

Things You'll Need

- Damp rag
- Outlet
- Hair dryer
- Air duster
- Stainless steel cleaner

1. Wipe off the dented surface of your stainless steel refrigerator with a clean, damp rag. Plug your hair dryer into an electrical outlet so that it will easily reach the dent in your stainless steel refrigerator. Place the air duster on a counter within arm's reach.

2. Point the hair dryer at the dent on your stainless steel refrigerator and turn it on to the highest heat setting. The hair dryer nozzle should be approximately an inch away from the surface of the refrigerator. Slowly move the hairdryer back and forth over the dented surface, heating the dent for one minute. Turn off the hair dryer.

3. Immediately pick up the air duster, holding it upside down so that the top is facing the floor. Spray the entire dented area of your stainless steel refrigerator with liquid carbon dioxide for 30 seconds.

Allstate New Jersey Insurance Company

MVR points. Points assigned by the Division of Motor Vehicles due to any violation of the state's motor vehicle laws

For new insurance policies, an accident is considered a qualifying accident if it results in a loss payment in at least one of the following coverages within the ***experience period****:

In other words, for an accident involving two vehicles, the owner or operator has been reimbursed for no more than 50% of his property damage loss by either on behalf of another person responsible for the accident as has obtained judgment against such other person for more than 50% of the property damage loss. For an accident involving three vehicles, the owner or operator has been reimbursed for more than 33 1/3% of his property damage loss by or on behalf of another person responsible for the accident, or has obtained judgment against such other person for more than 33 1/3% of his property damage loss in any such accident.

The first comprehensive loss will be assessed as a non-qualifying accident. The second and subsequent comprehensive losses that occur will be assessed as a qualifying accident

In addition the payout data falls within the current ***experience period****** .

FAX OUT TEST 5

6) Name and describe 5 steps of Cog's Ladder of team evolution

The Cog's Ladder was developed by Georges Chetrit in 1972, and it represents a model for group growth. It consists of five steps that are necessary for groups to work effectively. Groups can only move forward after completing the current step.

5 steps are:

1) Polite
2) Why we are here
3) Bid for Power
4) Constructive
5) Esprit

Groups can only move forward after completing the current step.

In the first polite stage group members are getting to know each other. This is an introductory phase where members strive to get acquainted or reacquainted with one another. During this phase, the basis for the group structure is established and is characterized by polite social interaction. All ideas are simple, controversy is avoided and all members have self-disclosure. Judgments of other members are formed, and this sets the tone for the rest of the group's time. All members participate in this stage but insecurity

Second stage is "Why we are here" stage. Group members want to know why they have been called together and what are group's goals and objectives. The specific agenda for each planning session will be communicated by the moderator or leader. In this phase individual need for approval begins to diminish, as the members examine their group's purpose and begin to set goals. Often social cliques will begin to form as members begin to find their fit in.

Bid for power is a third stage in Cog's ladder. It begins what group members try to convince each other that their position on an issue is correct. Often, the field of candidates for leadership positions narrows, as fewer members seek to establish power. Some of those who contributed freely to the group discussion in earlier stages may remain silent, wishing not to engage in a power struggle. It is noted that interactions arising out of this phase do not usually result in quantum solutions. Hence, there is a great need for structure and patience in this stage. Many different group roles arise in this stage- such as Dominance, Harmonizer, Aggressor, Follower etc.

In a constructive stage members not only begin to accept that others have an opinion worth expressing, but a team spirit replaces hidden agenda interests. Often, new levels of creativity are achieved and the group's productivity soars. If new individuals are introduced into the membership at this point they will be viewed as outsiders or intruders and the group will have to evolve back a couple of steps to assimilate them. In this stage, leadership is shared.

The final 'Esprit' stage is an "all for one and one for all" stage that few groups reach. It's characterized by a high interdependence and shared esteem among the members. At this stage, the members enjoy working together and are willing to defend

VL2: A Scaleble and Flexible Data Center Network

Abstract

To be agile and cost effective, data centers should allow dynamic resource allocation across large server pools. In particular, the data center network should enable any server to be assigned to any service. To meet these goals, we present VL2: a practical network architecture that scales to support huge data centers with uniform high capacity between servers, performance isolation between services, and Ethernet layer-2 semantics. VL2 uses (1) flat addressing to allow service instances to be placed anywhere in the network, (2) Valiant Load Balancing to spread traffic uniformly across network paths, and (3) end-system based address resolution to scale to large server pools, without introducing complexity to the network control plane. VL2's design is driven by detailed measurements of traffic and fault data from a large operational cloud service provider. VL2's implementation leverages proven network technologies, already available at low cost in high-speed hardware implementations, to build a scalable and reliable network architecture. As a result, VL2 networks can be deployed today, and we have built a working prototype. We evaluate the merits of the VL2 design using measurement analysis, and experiments. Our VL2 prototype shuffles 2.7 TB of data among 75 servers in 395 seconds – sustaining a rate that is 94% of the maximum possible.

1 INTRODUCTION

Cloud services are driving the creation of data centers that hold tens to hundreds of thousands of servers and that concurrently support a large number of distinct services (e.g., search, email, map-reduce computations, and utility computing). The motivators for building such shared data centers are both economic and technical, to leverage the economies of scale available to bulk deployments and to benefit from the ability to dynamically reallocate servers among services as workload changes or equipment fails [2, 11]. The cost is also large – upwards of $12 million per month for a 100,000 server data center — with the servers themselves comprising the largest cost component. To be profitable, these data centers must achieve high utilization and key to this is the property of agility — the ability to assign any server to any service.

Agility promises improved risk management and cost savings. Without agility, each service must pre-allocate enough servers to meet difficult to predict demand spikes, or risk failure at the brink of success. With agility, the data center operator can meet the fluctuating demands of individual services from a large shared server pool, resulting in higher server utilization and lower costs.

Unfortunately the designs for today's data center network prevent agility in several ways. First, existing architectures do not provide enough capacity between the servers they interconnect. Conventional architectures rely on tree like network configurations built from high-cost hardware. Due to the cost of the equipment, the capacity between different branches of the tree is typically oversubscribed by factors of 1.5 or more, with paths through the highest levels of the tree oversubscribed by factors of 80:1 or 240:1. This limits communication between servers to the point that it fragments the server pool — congestion and computation hot-spots are prevalent even when spare capacity is available elsewhere. Second, while data centers host multiple services, the network does little to prevent a traffic flood in one service from affecting the other services around it — when one service experiences a traffic flood, it is common for all those sharing the same network sub-tree to suffer collateral damage. Third, the routing design in conventional networks ties server addresses by assigning servers topologically significant IP addresses and dividing servers among VLANs. Such fragmentation of the address space limits the utility of virtual machines, which cannot migrate out of their original VLAN while keeping the same IP address. Further the fragmentation of address space creates an error prone configuration burden when servers must be reassigned among services and the human involvement typically required in these reconfigurations harms the speed of deployment.

To overcome these limitations in today's design and achieve agility, we arrange for the network to implement a familiar and concrete model: give each service the illusion that all its servers assigned to it, and only those servers, are connected by a single non-interfering Ethernet switch—a *Virtual Layer 2*—and each sits behind a load-balancer (LB) that spreads requests among the service's servers. Realizing this vision concretely translates into building a network that meets the following three objectives:

- *Uniform high capacity:* The maximum rate of a server to-server traffic flow should be limited only by the available capacity on the network interface cards of the sending and receiving servers, and assigning servers to a service should be independent of network topology.
- *Performance isolation:* Traffic of one service should not be affected by the traffic of any other service, just as if each service was connected by a separate physical switch.
- *Layer-2 semantics:* Just as if the servers were on a LAN—where any IP address can be connected to any port of an Ethernet switch due to flat addressing—data center management software should be able to easily assign any server to any service and configure

Selected FAQ

Q: I am having trouble send ng or receiving faxes over a VoIP (Vo ce over Internet Protocol) phone line. Why?

A: Because VoIP services are designed to work over slow band s dial telephone lines. Epson does not guarantee that fax transm ss on will work over VoIP phone lines. Some systems such as Cox Charter Time Warner Comcast, RCN, Vonage Clerk and Vonage)

Internet traffic can interfere with faxing because VoIP sends calls through the Internet and not through standard analog telephone line The data over your Internet ser vice can be divided into packets and this process can cause data ers.

You may try slowing the transmiss s speed of the fax by setting TCM and V.34 on the s ng s ons to Off. See Setup Save your Settings Section Fax options. If troubleshoo ng does not help, contact your VoIP service provider for help.

Coming Soon to a Phone Near You!

Baytown residents will soon be able to pay Utility Bills and Municipal Court Citations by phone using your keypad, reducing the convenience fee!

In March, your bill will include a new phone number to call to key in payment. Prompts will guide you through step-by-step.

For utility bills, enter the 11-digit account number, the numeric portion of your street address and a 10-digit phone number where you can be reached.

For court citations, enter the citation number, date of birth and a 10-digit phone number where you can be reached.

Then it is just as simple as entering your payment card number, expiration date, security code and the amount you are paying.

You will get a confirmation number upon completing payment.

IT'S FAST, EASY AND CHEAPER.

Fight F.O.G.

Keep Fats, Oils, and Grease Out of Your Drain!

F O G stands for Fats, Oils & Grease that are found in common food and food ingredients such as meat, fish, butter, cooking oil, mayonnaise, gravies, sauces and food scraps.

F O G Means Trouble!

If not handled properly, F O G can solidify and stick to the sides of your drain and pipes. Over time, a buildup of F O G can plug your pipes and cause a sewage backup. F O G's also cause operational problems with the City's sanitary sewer collection system and wastewater treatment facility.

What Can You Do? Follow just a few simple steps to help prevent sewer backups and spills.

- Pour cold fats, oils and grease into a covered, disposable container and throw in the garbage. NEVER pour these items down sink drains or toilets.
- Soak up spilled oil and grease with an absorbent material such as paper towels or kitty litter and throw into the garbage.
- Before you wash dishes, scrape food scraps, fats, oils, and grease into your garbage.
- Use sink strainers to catch remaining food waste while washing dishes.

Businesses
that cook and serve
food, such as restaurants, movie
theaters and bars, have special rules concerning
the handling of F.O.G.s.
To learn more about how you can fight F.O.G.s, visit www.baytown.org or call 281-420-5300.

Time and Tasks: College Questionnaire

For each of the 20 questions, circle either true (T) or false (F) as it applies to your behavior right now
If you are having trouble answering, choose the option that is more accurate for your more recent experience

1. T F I often find myself doing assignments that I had meant to do days before
2. T F I usually delay studying until right before a test, then I "cram."
3. T F When working on a larger project or research paper I start my work well in advance of the deadline
4. T F When it is time to get up in the morning, I usually get right out of bed.
5. T F When I receive a form from the college, it takes me a while to fill it out and return it. (Example: admissions, financial aid, class/instructor evaluations, surveys, etc.)
6. T F When working on a group project, we usually start meeting and working right away
7. T F Even with shorter assignments that don't take very long, I find that they don't get done for days.
8. T F I usually make decisions as soon as possible
9. T F I usually delay starting on assignments I need to do
10. T F When going to campus, I usually have to rush to get there on time.
11. T F When getting ready to go somewhere, I rarely get caught up in needing to do something at the last minute.
12. T F When studying, I often waste time by doing other things.
13. T F I do the assigned readings before class.
14. T F I keep a calendar or assignments book to track assignments, tests, and papers
15. T F I often have assignments done sooner than necessary
16. T F I always seem to end up doing my library research at the last minute
17. T F I usually buy books and supplies at the last minute.
18. T F I usually accomplish all the things I plan to do in a day
19. T F I frequently say, "I'll do that tomorrow."
20. T F I usually take care of all the tasks/assignments I have to do before I settle down and relax for the evening.

Testing Your HP Fax Machine with the HP Fax Test Service

Print Share

Introduction

This document will help you test your HP fax machine using the HP Fax Test Service. Print this document for easy reference by following the Print button link in the upper right corner of this page.

Test your fax machine

To test the capability of your fax machine, follow the directions below.

NOTE: Be sure that your phone number is not blocked by your telephone company prior to attempting to send a test fax. Pressing *82 before dialing the toll-free number will unblock the caller ID service for the next call. Other phone service features can prevent you from receiving a fax, including voice mail, call forwarding, or call privacy features.

NOTE: If you encounter problems testing a fax, it is good practice to set the *Automatic Reports* option to **Every Error** before attempting a test fax. This way, even if the test fax fails, one of the codes will be generated that will guide you in future troubleshooting. This setting is available in different places on different printers, consult the product User's Guide for specific steps.

1. Send a one-page blank paper fax to **1-888-fax-test** (1-888-473-2983).
2. After your fax is received by the HP Test Fax Service, we will generate a return fax to you within five minutes confirming that we received your fax. This will be sent to the fax number from which you sent the test fax.

If you do not receive your return fax within 5-7 minutes, the issue is most likely within the setup of your fax machine. Contact the manufacturer of the product for proper setup and configuration.

NOTE: The most common cause of failure is that the fax number set in the Fax Header will be machine-specific and will only work if the phone line connected to the fax is in, ensure that the fax number you are using is the 10-digit telephone number of the fax machine including the area code.

For more information or assistance, click Contact HP at the top of the page.

Step 3 Make a Test Call Using OBiTALK

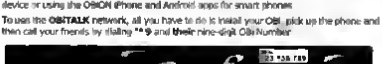
At any time, you may place a test call to the OBi Number below

OBiTALK Test No

Dial **9 followed by: 222 222 222

Your OBi is ready to make FREE calls to other OBi endpoints using the **OBiTALK** network. On the bottom of your unit, you will see a 9-digit OBi Number. This is **your** OBi Number. Give this number to your friends, family and colleagues so they can call you from their OBi device or using the OBiON iPhone and Android apps for smart phones.

To use the **OBiTALK** network, all you have to do is install your OBi, pick up the phone and then call your friends by dialing ****9** and their nine-digit OBi Number.



Step 4 Set-Up an OBiTALK Account Then Add Your OBi to the Account

Go to **www.obitalk.com**

Register for an OBiTALK account. This will allow you to easily activate devices and add any commercial VoIP services used with your OBi

The first time you log-in to OBiTALK a pop-up window will appear allowing you to add your device.

Click "Yes" to add Your OBi Device to the OBiTALK Dashboard. After adding your device, you will be able to set-up voice services and other configuration information. Multiple devices may be added to a single account.

Follow the on-screen instructions to add your OBi device to your OBiTALK account.

Once added, you will be directed to the Device Configuration page

- Set your OBi display name, time zone and daylight savings values
- Select the "Save Changes" button

Step 5 Set-Up VoIP Services

After you register and add your OBi device at www.obitalk.com, the OBi Device Configuration page will help you set-up commercial VoIP services such as the Google Voice™ communication service.

Do this by selecting the **Google Voice Set-Up** button. You may also select from any one of the other listed service providers. If your service is not there, you may use the Generic Service Provider option.

Generally, all you will need to set-up a service is the User Name and Password for the service.

Note: You will need to choose what phone port is to be used with the selected service. By default, both phone ports - Phone 1 & Phone 2, will work with the first service you add. To configure on your OBi202

Dear Pete,

Permit me to introduce you to the facility of facsimile transmission.

In facsimile a photocell is caused to perform a raster scan over the subject copy. The variations of print density on the document cause the photocell to generate an analogous electrical video signal. This signal is used to modulate a carrier, which is transmitted to a remote destination over a radio or cable communications link.

At the remote terminal demodulation reproduces the video signal for driving a printing device. This device is scanning in a raster scan synchronised with that at the transmitting terminal. As a result, a facsimile copy of the subject document is produced.

Probably you have uses for this facility in your organisation.

Yours sincerely,

Phil.

Cilantro Pesto

A delicious way to get your heart-protective fats and garlic. Plus...

Cilantro is an excellent de-toxifier.
Note: Use organic ingredients where possible

4 cups, loosely packed, of fresh cilantro
1/4 cup extra virgin olive oil
1/4 cup flax oil (high lignan if possible)
1/2 cup raw walnuts
3 tbsp. ground flax seeds
1/2 cup grated Parmesan or Romano cheese (optional)
4 cloves of garlic
Sea salt to taste

Using a food processor or blender, purée alternating quantities of cilantro, oil, walnuts, flaxseeds and garlic. Add cheese and salt (if desired) and finish with a last whoosh of course. Feel free to play with the proportions of the ingredients, depending on the consistency you want and your taste. This pesto freezes well-wrap single serving 'blobs' folded into aluminum foil or plastic wrap packets, or freeze in small plastic containers. Use it on pasta, vegetables or as a tapenade spread for veggie sandwiches

Introduction

This document will assist you in testing your HP Fax machine using the HP Fax Test Service

Print this document for easy reference by clicking the **Printable Version** link in the upper right corner of this page

Test your fax machine

To test the capability of your fax machine follow the directions below

NOTE Be sure that your phone number is not Caller ID blocked by your telephone company prior to attempting to send and receive a fax. Pressing *82 before dialing the toll free number will unblock the Caller ID blocking feature in most areas. Other phone company services can prevent you from receiving a fax, including voice mail, call blocking, or call privacy features.

NOTE Whenever troubleshooting a fax issue, it is good practice to set the *Automatic Reports* option to **Every Error** before attempting a test fax. This way, even if the item fax fails, an error code will be generated that will guide you in future troubleshooting. This option is available in different places on different products, consult the product *User's Guide* for specific steps.

1. Send a one page black and white test fax to **1-888-hpfaxme** (1-888-473-2963)
2. When your fax is received by the HP Test Fax Service, we will generate a return fax to you within five minutes confirming that we received your fax. This verifies that you can both send and receive a fax with your fax machine

If you do not receive a return fax within 5-7 minutes, there may be a problem with the setup of your fax machine. Consult the user manual that came with the product for proper setup and configuration

NOTE The most common cause of failure is that the fax number set in the Fax Header on the machine does not match the number of the phone line connected to the fax. Also ensure that the fax header contains the full 10-digit telephone number of the fax machine, including the area code

For more information or assistance, click **Contact HP** at the top of this page.

Economics and Statistics Administration
U.S. Census Bureau
Washington, DC 20233-9001
OFFICE OF THE DIRECTOR

Dear Resident,

The U.S. Census Bureau is conducting the American Community Survey. A Census Bureau representative will contact you to help you complete the survey. The survey will ask you questions about your household's characteristics, including such topics as education, employment, and housing. I would appreciate your help because the success of this survey depends on you.

The American Community Survey produces critical up-to-date information that is used to meet the needs of communities across the United States. For example, results from this survey may be used to decide where new schools, hospitals, and fire stations are needed. Survey data are used by federal, tribal, state, and local governments to make decisions and to develop programs that will provide health care, education, and transportation services that affect you and your community. This survey information also helps communities plan for emergency situations that might affect you and your neighbors.

The Census Bureau chose your address, not you personally, as part of a randomly selected sample. You are required by U.S. law to respond to this survey (Title 13, United States Code, Sections 141, 193, and 221). We estimate this survey will take about 40 minutes of your time.

I want to emphasize that any information you give our representative will be kept confidential. By law, the Census Bureau cannot publish or release to anyone any information that would identify you or your household (Title 13, Section 9). The information you provide can be used only for statistical purposes.

If you have access to the Internet and want to learn more about the American Community Survey, please visit our website at census.gov/acs.

Thank you for your help.

Sincerely,

John H. Thompson
Director, U.S. Census Bureau

Configure Log Files

The MAP Toolkit Software Usage Tracker gathers information about users and devices that access your servers. For some server products, it analyzes log files and system information to provide data that you can use to track usage of server software. To prepare to use Usage Tracker, you must first configure your computers to generate log files that contain the data necessary for usage tracking analyses. You will require log files for the following products

- Windows Server
- Microsoft SQL Server 2008
- Microsoft SharePoint® Server 2010
- Microsoft Office SharePoint Server 2007
- Microsoft Office SharePoint Portal Server 2003

Windows Server Usage

To capture logon information, the Audit Logon policy needs to be set to Success, which is the default for all Windows Server operating systems since Windows Server 2003. You can also set this configuration manually in the Group Policy Management Console (GPMC) or automatically using the Auditpol.exe command line tool.

For more information about these Group Policy settings, see the following resources

- For Windows Server 2008, see the Microsoft Help article Microsoft Knowledge Base article 921469.
- For Windows Server 2003, see Define or modify auditing policy settings for an event category.

SQL Server Usage

SQL Server 2008 Enterprise and Datacenter Editions introduced audit event configuration for Windows security logging, which enables SQL Server 2008 to log logon events to the Windows Security log. The MAP Toolkit can parse these logs to track usage for SQL Server 2008 Enterprise and Datacenter Editions.

To enable SQL Server 2008 to log audit events to the Windows security log

On each SQL Server 2008 instance for which you need to track usage, run the following SQL command:

```
/* Turn LOGIN logging on */
USE MASTER
GO
/* Note the name 'Server Audit' is your choice */
CREATE SERVER AUDIT [Server Audit]
TO SECURITY_LOG WITH ( QUEUE_DELAY = 1000, ON_FAILURE =
CONTINUE)
ALTER SERVER AUDIT [Server Audit]
WITH (STATE = ON)!

USE MASTER
```

Windows® Fax and Scan

One place to scan and fax your documents

FAX: You can send and receive faxed documents on your computer without using a fax machine. You can also print, e-mail, or save a copy of your faxes.

To get started

1. Connect a phone line to your computer.

   If your computer needs an external modem, connect the phone to the modem, and then connect the modem to your computer.

2. On the toolbar, click **New Fax.**

3. Follow the instructions in the setup wizard to connect to a fax modem, and then, when you're finished, create your fax.

To connect to a fax server instead of a modem, contact your system administrator. For more help with faxing, click the **Help** button on the toolbar.

SCAN: After you add a scanner to your computer, you can preview documents or pictures before you scan them, and then adjust your scan settings for better results. You can also fax or e-mail scanned files to someone else.

To get started

1. Connect your scanner to your computer by following the instructions that came with your scanner, and then place a document or picture on the scanner.

2. In Windows Fax and Scan, at the bottom of the left pane, click **Scan.**

3. On the toolbar, click **New Scan.**

4. Choose the scan settings you want to use, and you're ready to scan.

Use the options on the toolbar to fax, e-mail, print, or copy scans at any time. For more help with scanning, click the **Help** button on the toolbar.

Prayer to St. Joseph over 1900 years old

O St. Joseph whose protection is so great, so strong, so prompt before the Throne of God, I place in you all my interests and desires. O St. Joseph do assist me by your powerful intercession and obtain for me from your Divine Son all spiritual blessings through Jesus Christ, Our Lord: so that having engaged here below your Heavenly power I may offer my Thanksgiving and Homage to the most Loving of Fathers. O St. Joseph, I never weary contemplating you and Jesus asleep in your arms. I dare not approach while He reposes near your heart. Press him in my name and kiss His fine Head for me, and ask Him to return the Kiss when I draw my dying breath. St. Joseph, Patron of departing souls, pray for us. Amen

Say for nine consecutive mornings for anything you may desire. It has seldom been known

to fail.

This prayer was found in the fifteenth year of Our Lord Jesus Christ. In 1500's it was sent by the Pope to Emperor Charles when he was going into battle.

Whoever reads this prayer or hears it or carries it, will never die a sudden death, nor be drowned, nor will poison take effect on them. They will not fall into the hands of the enemy nor be burned in any fire, nor will they be defeated in battle.

Make this prayer known everywhere

Imprimatur
Most Rev. George W. Ahr
Bishop of Trenton

Presumably you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both:

To test the send functionality of your fax machine, send a one-page fax to 1-855-330-1239 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero. this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully, it will automatically answer and spit out the test fax.

Mr Booth

We are in receipt of your correspondence about the rental agreement and would like to inform you that we spoke to a gentleman on June 1 2015 who extended the rental agreement past June 3 2015. If there was a problem with the rental fee, we would have expected him to inform us after his approval. Since this claim started we have spoken to several people in the claims department since we were responsible and we have received any and all phone calls from you regarding this claim. We were never informed about a supplement which was required from the shop. I spoke to Mr Junkiewicz and informed him that our vehicle was constantly running late and he affirmed the rental price for keeping the vehicle at the shop. The mechanic has cried on several occasions to reach you and has leave and returned any of his phone calls. He recently called us on Friday June 5 2015 and left message for you to return his call. There was an additional delay with the radiator because it would not fit properly. The rental car has been returned and we have a final bill for repairs. How should we present this bill as you for reimbursement?

We have had constant problems since the claim started. I have enclosed a copy of a text from the appraiser who said he would not proceed with the claim until Mr. LLLL paid his mortgage. This text message prompted Mr Junkiewicz to get on alert and we certainly appreciate his efforts as well as others who assisted us with this claim.

Nature Helps Kids Learn

Scientists at Spain's Centre for Research in Environmental Epidemiology have found that greening urban schools improves the memory development of children and reduces exposure to air pollution—both of which help improve academic performance.

In three 9-month studies—the first of its kind—the researchers tested 2,593 children ages 7 to 10 at 36 primary schools in Barcelona, some with more playground foliage than others. The results showed that after a year, kids exposed to more greenery (as measured by satellite imagery) got more exercise and displayed greater improvement in cognitive skills such as memory and attention than their peers with less access to green space. The researchers also found lower levels of traffic-related air pollution inside schools surrounded by greenery, which they believe contributed to the results. Reporting in the June 7 *Proceedings of the National Academy of Sciences*, they note how greenery or green spaces (such as the Georgia playground above) increase physical activity, which "has been associated with better cognitive function in children" and could have "positive effects throughout the life course." First-Known Warm-Blooded Fish

NOAA scientists have discovered that the opah, or moonfish, can warm itself throughout its body much as mammals and birds do, giving it a competitive advantage in its deep-sea habitat. Roughly the size of a large car tire, the opah ranges in oceans around the globe and swims by flapping its pectoral fins, like wings. Through studies of specimen tissue samples, they have also discovered that the fish's vessels carry warm blood to its gills.

Writing in May in *Science*, the researchers noted that other fish inhabiting such cold depths tend to be slow and sluggish, conserving energy by unhooking only a small number of muscles at a time. But the opah's constant, high-energy lifestyle, body and gills require it to maintain a high-performance predator that warms itself "makes more sense and is more sharp" than its prey. There has never been anything like this seen in a fish," says NOAA Fisheries biologist Nicholas Wegner.

SECOND (Hidden Battery Power)

Imagine your cell battery is very low To activate press the keys *3370# Your cell phone will restart with this reserve and the instrument will show a 50% increase in battery This reserve will get charged when you charge your cell phone next time

THIRD (How to disable a STOLEN mobile phone?)

To check your Mobile phone s serial number key in the following Digits on your phone

***#06#** .

A 15-digit code will appear on the screen This number is unique to your handset. Write it down and keep it somewhere safe

If your phone is stolen you can phone your service provider and give them this code. They will then be able to block your handset so even if the thief changes the SIM card your phone will be totally useless You probably won't get your phone back but at least you know that whoever stole it can't use/sell it either If everybody does this, there would be no point in people stealing mobile phones

And Finally ...

FOURTH (Free Directory Service for Cells)

Cell phone companies are charging us $1 00 to $1 75 or more for 411 Information calls when they don't have to Most of us do not carry a telephone directory in our vehicle which makes this situation even more of a problem When you need to use the 411 Information option simply dial

Developing Houses into Hotels by Attaining & Keeping Your Seat at the Table

Presenter: Art Kaplan
Session Time: 8:15 - 9:30 a.m.
This presentation qualifies for CLE accreditation credit.

Law firms are turning to legal administrators to help partners navigate the unprecedented economic obstacles that are impacting the entire profession. As turn-aground does not nothing more than recognition and are redefining their roles as they successfully navigate cascade furloughs. They are earning and keeping seats at the senior management table by contributing to their firms' growth and longevity. Legal administrators and law firm managers will learn creative strategies for earning the trust of the partnership and equitably spotlighting their contributions.

Art Kaplan has practiced law with large firms in New York City for nearly 9 years and has been recognized on CNN and in the Wall Street Journal's Law Blog, the Chicago Tribune, the Hour in Chronicle, the Miami Herald, the New York Post, Above the Law, and other publications. Kaplan is the author of The Opportunity Makes Strategies for Inspiring Your Legal Career Through Creative Networking, and Business Development (Thomson West, 2008) which the New York Law Journal called "a must-have resource for marketing lawyers."

DISC - What Every Administrator Should Have in Their Community Chest

Presenter: Lyn Deverkin
Session Time: 9:45 - 11:00 a.m.
This presentation qualifies for the initial CLE Application (as Self-Management Skills) and Ethics (1 credit).

DISC is the universal language of observable human behavior, or "how we act." DISC does not measure, education, experience values or intelligence. It simply measures actual visible behaviors, or how they communicate. With the knowledge of DISC, you can learn to understand and appreciate your behavior style and then adapt your style in communicating with others. This session will help you understand your own communication style and the styles of your coworkers. You will receive helpful ideas and how to very easily change or adapt your style for success.

Although terms, attributes will receive a DISC report as part of the registration fee. Those unable to attend ACE, an e-mail will follow with an online link to complete the assessment. Email addresses provided in response to this survey will remain confidential and will not be used for future marketing purposes.

Ms. Deverkin is President of STRATEGYX, Inc. a consulting firm specializing in all aspects of human resources, from leadership development to change management and training, all geared to increasing profit for clients. Ms. Deverkin holds a Master's in Human Resource Management from Devry University, an MBA from Cardinal Stritch University, as well as a Master's of Science and a Bachelor of Science both from the University of Wisconsin, in Milwaukee.

SILENT NIGHT

Silent night, holy night,
All is calm, all is bright
Round yon Virgin Mother and Child,
Holy infant so tender and mild
Sleep in heavenly peace,
Sleep in heavenly peace.

Silent night, holy night,
Shepherds quake at the sight
Glories streams from heaven afar
Heav'nly hosts sing Alleluia,
Christ the Saviour is born,
Christ the Saviour is born

Silent night, holy night
Son of God, love's pure light,
Radiant beams from Thy holy face
With the dawn of redeeming grace,
Jesus, Lord at Thy birth,
Jesus, Lord at Thy birth.

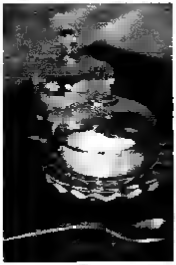
Passionfruit & White Chocolate Mousse

March 2, 2008 by Not Quite Nigella



OK I admit it, I just needed any excuse to use this little crystal set again. I received these from my husband's aunt Pavl for my kitchen tea and I just adore the little heil shaped lids and the heavy cut crystal bases. It seems only appropriate that a feathery light passionfruit mousse adorns this delicate dome shaped offering. Its a perfect fruity light accent to an afternoon tea or dessert. Just be sure to serve it from the fridge, it left out for too long, it will become a little runny and lose some of its gorgeous mousseiness!

CancerTYPE ID — Molecular Classification with CancerTYPE ID

FFPE Tissue Processing & Tumor Enrichment

- CancerTYPE ID requires as few as 300-500 viable tumor cells and is compatible with limited biopsy specimens such as FNAs, cytological specimens, and small core needle biopsies.
- CancerTYPE ID routinely employs laser guided microdissection to enrich for tumor specimen.

Gene Expression Profiling

- CancerTYPE ID uses a robust real-time RT-PCR platform to detect very small differences in gene expression.
- CancerTYPE ID measures and integrates the gene expression of 92 genes, 5 normalization genes and 87 lineage determinant and tissue-specific genes, most of which are not routinely measured by IHC.

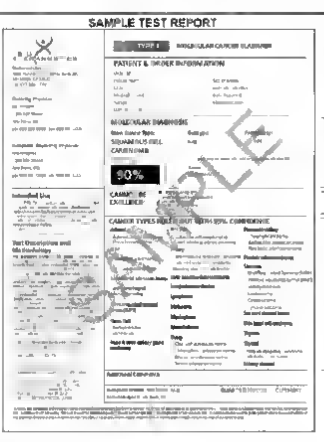
Reference Tumor Database & Algorithm

- CancerTYPE ID uses a computational algorithm to predict the patient's tumor type based on the degree of similarity of the sample's 92-gene expression profile to a reference database of gene expression profiles. The reference database contains gene expression information from over 2,000 tumor specimens of known histogenesis, and representing ~95% of all solid tumors based on incidence.
- The CancerTYPE ID algorithm provides a predicted main type and any sub-types in rank-order by relative probabilities, which are based on the tumor's gene expression similarity to tumors of these types in the reference database.

Molecular Classification

- CancerTYPE ID classifies 28 tumor types and 50 tumor subtypes.
- In an independent validation of 2998 blinded samples, the molecular diagnosis was 87% accurate for main tumor type and 86% accurate for tumor subtype.

SAMPLE TEST REPORT



Interpreting CancerTYPE ID Test Results

MOLECULAR DIAGNOSIS

The [redacted] molecular diagnosis is the CancerTYPE ID prediction of certain tumor subtypes. It is reported probability (≥ 80%), the tumor is reported as "Indeterminate", in this case, the test report will also indicate tumor types that can be ruled out (see below) that cannot be excluded.

CAN NOT BE EXCLUDED

When applicable, tumor types on the CancerTYPE ID reference database that share some gene expression profile similarity to the patient's sample such that they cannot be excluded. Item diagnostic consideration will be listed here in rank order.

RULE OUTS

The CancerTYPE ID test report also lists tumor types that can all be ruled out with 95% confidence. In an independent validation of 2998 blinded samples, the rule-outs were 95% accurate. This may provide useful differential diagnostic information when two or more potential tumor types are suspected and one or more tumors may be ruled out in the rule outs.

hallowed be thy name,
thy kingdom come,
thy will be done,
on earth as it is in heaven
Give us this day our daily bread
And forgive us our trespasses,
as we forgive them that trespass against us
And lead us not into temptation,

As I was walking up the stair
I met a man who wasn't there
He wasn't there again today
Oh how I wish he'd go away

When I came home last night at three
The man was waiting there for me
But when I looked around the hall
I couldn't see him there at all!
Go away, go away, don't you come back any more!
Go away, go away, and please don't slam the door

Last night I saw upon the stair
A little man who wasn't there
He wasn't there again today
Oh how I wish he'd go away

Important 911 Information

Ooma wants to make sure that you are aware of important differences in the way 911 service operates with Ooma when compared with traditional landline service. Here's what you need to keep in mind:

Differences between traditional 911 service and Ooma 911

As advised, if a Ooma 911 service user relocates to a traditional 911 service, Ooma recommends that such user unregistered 911 service and your emergency calls may be routed to an emergency response center which does not keep your contact information on file.

Be prepared during any service interruption.

Ooma phone service depends not only on your Internet subscription and payment for the service, but also on Internet connectivity and power function. In the event of power, network or Internet outages (including congestion), if your service is disconnected or suspended due to non-payment, you may experience a brief disruption in your 911 service. We recommend that you keep an alternative phone service (such as a cellular telephone) handy to increase the reliability of your access to emergency services during any service interruption.

Do not disconnect.

Until you are told to do so by an emergency dispatcher, do not disconnect your 911 call. If you are inadvertently disconnected, redial immediately.

Keep your service address up-to-date.

Ooma will attempt to provide the emergency operator with your service address, so please ensure that your information on file with us is always accurate and updated. You may update your address online or by calling customer support at 1-888-711-6662. If you do not do this (for example if you are unable to access during a 911 call), the emergency operator may assume that you are calling from the last registered address.

Inform other users.

You must notify members of your household and other potential users of your Ooma phone service line and limitations of 911 emergency calls.

Limitations of Liability.

Ooma's terms of service limit and disclaim liability related to Ooma 911 service, so please read these carefully.

For a complete description of our Ooma 911 service, please see Ooma's Terms of Service at www.ooma.com/911

Please leave this notice next to your phone.

Cannibals

A cannibal father and son went hunting. Deep in the jungle, they hid beside a trail. Soon, a little old man walked by. The son whispered, "Dad! There's one. Let's get him!"

"No," said his father. "Not enough meat. We wait."

Later, a fat man came along. "Dad! He's huge. Let's get him!"

"No," his father said. "We'd all have heart attacks from all the fat in him. We wait."

Hour later, an absolutely gorgeous woman approached.

"Dad! There's nothing wrong with that one. Let's eat her."

"No," said his father. "We'll not eat her either."

"Why not?"

"We'll take her home alive and eat your mother!"

Never miss another fax. No machine required. It's as easy as email!

Presumably, you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both

To test the send functionality of your fax machine, send a one-page fax to 1-855-330-1239 (a toll-free number in the United States) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number Within a minute, your fax should appear on the site. Click the thumbnail to see a large version

To test the receive functionality of your fax machine, point your web browser to FaxZero this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully, it will automatically answer and spit out the test fax

Fax

Presumably, you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both.

To test the send functionality of your fax machine, send a one-page fax to 1-888-877-1655 (a toll-free number in the United States). When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero. This site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully, it will automatically answer and spit out the test fax.

This might be a typical fax, with several short sentences spread throughout the page.

China Doll

Radermachera Sinica

China Doll occurs naturally as a forest plant in S W China and was used as a landscape plant in California and Florida in the 1930's. Seed grown plants were introduced in the m d 1980's and it has since become a popular houseplant. A bicolor form called "Crystal Doll" is available

These plants are pretty and delicate looking they have a compact shape to begin with but with time they stretch out and become leggy. A light and airy tree it rarely blooms indoors but a happy plant will produce pure white fragrant blooms. The bloom spikes are produced at the end of mature branches. One to five blooms will open per night on each spike end about half will fall from the tree by midmorning. Once they open at night the scent is comparable to Night Blooming Jasmine but not as overpowering.

LIGHT: Bright light to full sun will tolerate medium light but some loss of lower leaves may occur. China doll like many houseplants benefit immensely from spending the summer outside. When they are moved outside for the summer, gradually accustom them to higher light levels. Indoor plants should not be placed in direct sun immediately. Wash and rinse all plants before returning indoors

WATER: Water thoroughly with lukewarm water, and allow the top third of the soil to become slightly dry before watering again. Do not allow these plants to sit water. Complete dehydration will cause sudden and complete leaf drop. If allowed to dry out completely, severe and permanent damage may occur. Watering must be very consistent. Yellow brittle leaves indicate under watering, a blackish tip an green leaves indicates over watering. Water these plants less in the winter

TEMPERATURE: Indoor temperatures averag ng 18°C/65°F are best. The foliage benefits from being sprayed with water in winter months heated rooms may need additional humidity. Misting, pebble trays and or humidifiers will help the leaves stay lush and healthy

FERTILIZER: Every 3 weeks during spring and summer with a water soluble food, in fall and winter, fertilize once a month with a half strength solution.

PROPAGATION: Stem cuttings in summer, seed.

SOIL/CONTAINER: 2 parts peat moss to 2 parts loam to 1 part sand or perlite or a well drained commercial potting mix. Add a few inches of drainage material to the bottom of the container, and do not use containers that do not have drain holes. Repot in spring only when very root bound. Containers should be an inch or two larger than the previous pot. Do not disturb the roots when repotting, and do not bury the trunks in soil

TIPS: Keep new growth pinched out to maintain plant shape and compactness

TREVOR

Prayer to St Joseph over 1900 years old

O St Joseph whose protection is so great so strong, so prompt before the Throne of God, I place in you all my interests and desires. O St. Joseph do assist me by your powerful intercession and obtain for me from your Divine Son all spiritual blessings through Jesus Christ Our Lord, so that having engaged here below your Heavenly power I may offer my Thanksgiving and Homage to the most Loving of Fathers. O St. Joseph I never weary contemplating you and Jesus asleep in your arms I dare not approach while He reposes near your heart Press him in my name and kiss His fine Head for me, and ask Him to return the Kiss when I draw my dying breath St Joseph, Patron of departing souls, pray for us Amen

Say for nine consecutive mornings for anything you may desire. It has seldom been known to fail.

This prayer was found in the fiftieth year of Our Lord Jesus Christ In 1500's it was sent by the Pope to Emperor Charles when he was going into battle

Whoever reads this prayer or hears it or carries it, will never die a sudden death nor be drowned, nor will poison take effect on them. They will not fall into the hands of the enemy nor be burned in any fire, nor will they be defeated in battle

Make this prayer known everywhere.

Imprimatur

Adobe Acrobat PDF Files

Adobe® Portable Document Format (PDF) is a universal file format that preserves all of the fonts, formatting, colours and graphics of any source document, regardless of the application and platform used to create it.

Adobe PDF is an ideal format for electronic document distribution as it overcomes the problems commonly encountered with electronic file sharing.

- ***Anyone, anywhere*** can open a **PDF file**. All you need is the free Adobe Acrobat Reader. Recipients of other file formats sometimes can't open files because they don't have the applications used to create the documents.
- PDF files ***always print correctly*** on any printing device.
- PDF files **always** display ***exactly*** as created, regardless of fonts, software, and operating systems. Fonts and graphics are not lost due to platform, software, and version incompatibilities.
- The free Acrobat Reader is easy to download and can be freely distributed by anyone.
- Compact PDF files are smaller than their source files and download a page at a time for fast display on the Web.

No Fear (Cont.)

The man replied, "Yep, sure do."

"Aren't you afraid of me?" Satan asked.

"Nope, sure ain't." said the man.

"Don't you realize I can kill you with one word?" asked Satan.

"Don't doubt it for a minute," returned the old man, in an even tone.

"Did you know that I can cause you profound, horrifying AGONY for all eternity?" persisted Satan.

"Yep," was the calm reply.

"And you're still not afraid?" asked Satan.

"Nope," said the old man.

More than a little perturbed, Satan asked, "Why aren't you afraid of me?"

The man calmly replied, "Been married to your sister for 48 years."

Magic: The Gathering Comprehensive Rules

These rules are effective as of November 1, 2013.

Introduction

This document is designed for people who've moved beyond the basics of the **Magic: The Gathering®** game. If you're a beginning **Magic™** player, you'll probably find these rules terribly daunting. They're intended to be the ultimate authority for the game, and you won't usually need to refer to them except in specific cases or during competitive games.

For casual play and most ordinary situations, you'll find what you need in the **Magic: The Gathering** basic rulebook. You can download a copy of that rulebook from the Wizards of the Coast® **Magic** rules website at **Wizards.com/Magic/Rules**. If you're sure that's where you want to be, keep reading.

This document includes a series of numbered rules followed by a glossary. Many of the numbered rules are divided into subrules, and each separate rule and subrule of the game has its own number. (Note that subrules skip the letters "l" and "o" due to potential confusion with the numbers "1" and "0".) A subrule (704.5k) is followed by 704.5m, then 704.5n, then 704.5p, for example.)

We at Wizards of the Coast recognize that no matter how detailed the rules in addition will arise in which the interaction of specific cards requires a precise answer. If you have questions, you can get the answers from us at **Wizards.com/Customerservice**. Additional contact information is on the last page of these rules.

In response to play issues and to keep these rules as current as possible, changes may have been made in this document since its publication. See the Wizards of the Coast **Magic** rules website at **Wizards.com/Magic/Rules** for the current version of the official rules.

Chocolate-raspberry cheesecake

Ingredients

- 1-1/2 cups finely crushed graham crackers
- 1/4 cup sifted powdered sugar
- 1/3 cup butter, melted
- 2 cups fresh or frozen loose-pack raspberries, thawed
- 1/2 tsp. granulated sugar
- 3 8-oz. pkg. cream cheese, softened
- 14-oz. can sweetened condensed milk
- 4 eggs
- 1 tsp. vanilla
- 1 cup semisweet chocolate pieces (6 oz.), melted and cooled

directions

1. Preheat oven to 350 degrees F. For crust, combine crushed crackers and powdered sugar; stir in melted butter. Press onto bottom and about 2 inches up sides of a 9-inch springform pan. Set aside.
2. In a small bowl stir together 1 cup of the raspberries and the granulated sugar. Set aside. For filling, in a large mixing bowl beat cream cheese and condensed milk with an electric mixer until combined. Add eggs and vanilla; beat just until combined. Divide batter in half. Stir melted chocolate into half of the batter. Pour chocolate batter into crust-lined pan. Stir raspberry-sugar mixture into remaining batter. Spoon raspberry batter over chocolate batter.
3. Place pan on a shallow baking pan. Bake for 50 to 60 minutes or until center appears nearly set when pan is gently shaken. Cool in pan on a wire rack for 15 minutes. Loosen crust from sides of pan. Cool 30 minutes. Remove sides of pan; cool cake completely. Cover; chill at least 4 hours. Serve with remaining raspberries. Makes 16 servings.

will reduce lost disk space due to slack, and will reduce defragmentation time on partitions containing more rarely-used data. (We won't go too much more on the issues involved in partitioning.) So instead, let's say you want to split up this drive as follows:

- One 8 GB primary partition for Windows and other operating system and program files.
- One 12 GB partition for data.
- One 16 GB partition for games.
- The rest of the disk as a 24 GB partition for large multimedia files, short-term backups and "future expansion"

your anger profile 1

for you to know

While each person's experience with anger is different, it's important to recognize your own personal profile so you can learn to head off anger before it gets the best of you. Assessing your anger will help you become more aware of how much it drives your behavior.

Terrence was having a really bad day. Mr. Williams, Terrence's English teacher, noticed that he seemed angry about something. "Oh no," thought Mr. Williams, "Terrence is in one of his moods. He's so smart and talented, but his anger is really hurting him. He's going to get into trouble if he doesn't turn it around."

After class, Mr. Williams called Terrence over and said, "You take everything so seriously, Terrence. Your anger is beginning to get in the way of your schoolwork, and I'm really worried about you. You've been suspended three times this year and you're constantly in the principal's office. Let me help you. What do you say?"

Terrence knew that Mr. Williams was right. So he nodded his head and said, "Yeah, okay—"

"Great," Mr. Williams said. "We'll begin by taking a good look at your anger. Once we see what effect it has on you, we can start to come up with a plan to help you manage it."

The Dividend Machine

Closing Thoughts

My very first dividend check was $44. My father saw it and joked, "What are you going to do with it, buy a Happy Meal?"

It wasn't much, but it was the first check I'd ever gotten that I didn't have to work for, and I really liked the idea of that. My next dividend check was $68, then $140, then $240.

Then one day I went to the mailbox and slid open the thin envelope. As I pulled out my quarterly dividend check, I caught my breath. The check was for $1,400. It wasn't enough to live on, but my dividends had grown exponentially in just 2 1/2 years. I was continuing to invest every month and starting to see the results.

More important, I could see that my goal was within reach. I did some quick calculations and determined that if I could keep my dividend machine growing, I could retire at age 50.

I actually achieved that goal eight years early. How? By buying companies that were selling for well below their intrinsic value. And that's what I continue to do every month in The Dividend Machine.

I appreciate investing the way legendary ice hockey player Wayne Gretzky approaches his sport. He famously said, "I skate to where the puck is going to be, not where it has been."

And I buy stocks for where they will be three or five years from now, not where they were three or five years ago. This approach has kept me focused on good companies and kept me away from chasing stocks that are driven higher by irrational market behavior. I urge you to adopt the same focus for your investments.

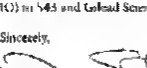
Actions to Take

Action No. 1: Grab one of the best companies in the out-of-favor oil sector, National Oilwell Varco (NOV) – up to $68 a share for your Conservative Portfolio.

Action No. 2: Make room for NOV by selling McDonald's (MCD) at market.

Action No. 3: Note that I have raised our buy prices for Altria (MO) to $43 and Unilead Sciences (UL) to $30.

Sincerely,



Bill Spectre

St. Theresa's Prayer

May today there be peace within.
May you trust God that you are exactly where you are meant to be.
May you not forget the infinite possibilities that are born of faith.
May you use those gifts that you have received, and pass on the love that has been given to you.
May you be content knowing you are a child of God.
Let His presence settle into your bones, and allow your soul the freedom to sing, dance, praise and love
It is there for each and every one of us

PATIENT NAME
Name Of Patient
DATE OF BIRTH
03/31/1941
DATE OF SERVICE
01/29/2009
ACCOUNT NUMBER
6005999

HISTORY
Mr. Patient returns today for follow-up. When last evaluated, he was referred for an updated MRI given a new onset left lower extremity radiculopathy. He is now 10 months status post right L4-5 synovial cyst excision. He returns today for discussion of the results of his recent MRI. In the interval since his last evaluation, his radicular left leg pain has settled down somewhat. He feels his pain has responded to nonsteroidal antiinflammatories and tachi. He does note that his pain is worse upon waking in the morning and eases throughout the day.

PHYSICAL EXAMINATION
Lower extremity neurologic testing is nonfocal with regard to strength and sensation today.

DIAGNOSTIC DATA
X-RAY FINDINGS
Re-review of his AP and lateral radiographs from his prior office visit on 01/09/09 do reveal a subtle grade 1 spondylolisthesis at the operative level.

MRI: An updated MRI of the lumbar spine obtained at DHMAC on 01/20/09 reveals a left sided synovial cyst at L4-5. To be clear and consistent, the left sided cyst is noted at the prior operative level. The report does refer to this as the L5-S1 level.

DIAGNOSIS
1. Grade 1 L4-5 spondylolisthesis with left sided L4-5 synovial cyst
2. Status post right L4-5 synovial cyst excision.

TREATMENT PLAN
Mr. Patient has now developed radicular left leg pain and a synovial cyst at his prior operative level. His symptoms have improved with conservative care and in the absence of weakness, we will allow him the passage of time. If his improvement plateaus or his symptoms worsen, I would refer him for a left L4-5 epidural steroid injection. If ultimately we come to surgery, I would likely entail an L4-5 transforaminal lumbar interbody fusion. This was discussed briefly with the patient today. On his next follow-up in our office, lateral flexion extension radiographs of the lumbar spine will be obtained to evaluate for dynamic instability. I will wait to hear from the patient.

This program will take 10 weeks to complete the trip. In addition to the weekly exercise everyone is eligible to receive a special reward. The schools who develop and carry out the most successful initiatives. The program ends through Friday, May 1st.

COUNSELOR'S CORNER

With MCAS testing right around the corner, here are a few tips that may help you to prepare your child for their testing experience.

- Do talk with your child about what they are doing in class and ask what they are making
- Do express a positive attitude about school and confidence in your child's ability to do well
- Do find out your child's TV time
- Do limit your child's time to enjoy their favorite shows
- Do ensure that your child gets a good night sleep the night before the test and eats a nutritious breakfast the day of the test.
- Do reassure your child that test scores are only one measure of their ability, not the whole picture.
- Do realize that putting too much emphasis on the test and the results can increase your child's anxiety.
- Do praise your child for the things he or she does well, and be supportive of his or her efforts, especially in areas of weakness that are challenging. Kids who feel good about themselves and their abilities and who aren't fearful about making mistakes will feel more confident, and less anxious, when taking tests.

Here's a little something from Dr. Seuss that could help A LOT with MCAS test stress.

Enjoy. Miss Bonkers rose. "Don't fail," she said.

"You've learned the things you need to pass that test and many more. I'm certain you'll succeed.

We've taught you that the earth is round, that red and white make pink, and something else that matters more. We've taught you how to think." "I hope you're right," sighed Mr. Lowe. He took another chair. "The tests in ten minutes, and you're taking it right here."

Means-Tested Public Benefits

Federal Means-Tested Public Benefits. To date, Federal agencies administering benefit programs have determined that Federal means-tested public benefits include food stamps, Medicaid, Supplemental Security Income (SSI), Temporary Assistance for Needy Families (TANF), and the State Child Health Insurance Program (SCHIP).

State Means-Tested Public Benefits. Each State will determine which, if any, of its public benefits are means-tested. It is State determination that it has programs which meet that definition. It is encouraged to provide notice to the public on which programs are included. Check with the State public assistance office to determine which, if any, State assistance programs have been determined to be State-administered public benefits.

Programs Not Included: The following Federal and State programs are not included as means-tested benefits: emergency Medicaid; short-term, non-cash emergency relief; services provided under the National School Lunch and Child Nutrition Acts; immunizations and testing and treatment for communicable diseases; student assistance under the Higher Education Act and the Public Health Service Act; certain forms of foster-care or adoption assistance under the Social Security Act; Head Start Programs; means-tested programs under the Elementary and Secondary Education Act; and Job Training Partnership Act programs.

* There poverty guidelines remain in effect for use with Form I-864, Affidavit of Support, from March 1, 2015 until new guidelines go into effect in 2016.
